FINANCIAL INVESTIGATION REPORT

Prepared by:

Survey Corps — Investigation Engine

Case reference: run_20260704_045034

Generated: 04 July 2026, 04:53

This report presents investigative leads based on transaction pattern analysis. It does not establish guilt — all findings should be independently verified before action.

Case Narrative

In brief, for the investigating officer:

- A total of Rs 21,064,046.10 moved across the accounts in this case, of which Rs 8,284,635.43 entered the suspect network from outside.
- The largest source of funds was account 48880432099033, which sent out Rs 2,775,120.76.
- Money was routed through 1 intermediary account that received funds and quickly passed them on.
- GAURAV KHANNA with account 68699629400471 spread money to 614 different accounts.
- Account 48880432099033 collected money from 138 different accounts.
- Rs 1,138,297.22 of incoming funds was traced to onward transfers or withdrawals.
- The account to investigate first is 48880432099033, which shows the strongest combination of suspicious behaviors in this case.

INVESTIGATE FIRST

Prime Suspects — Investigate First

The highest-priority accounts in this case, in order:

#1 • acct_001 (48880432099033) WEAK • Score 218

Key Concern: Money Trail Tracing

The money trail starts with a credit of ₹294000.24 to account acct_001 and ends with 5 debits, with all the credited amount being allocated and none remaining untraced.

#2 • CIF No (96465802265) WEAK • Score 196

Key Concern: Cross Statement Links

The matched flow link between the debit and credit transactions is based on the exact reference match, with a confidence score of 1.0, and the shared reference '49652837781' provides additional corroboration for the link.

#3 • GAURAV KHANNA (68699629400471) WEAK • Score 125

Key Concern: First Contact Large Transfer

acct_007 and acct_002 had no prior observed relationship before a large transfer of 284358.16 on 2025-08-09.

#4 • CIF No (6332927949015177) WEAK • Score 120

Key Concern: Money Trail Tracing

The credited amount of ₹276578.67 was fully allocated to a subsequent debit of ₹289258.71, with the difference likely due to fees or other charges.

ISOLATED CLUSTERS

cluster_001 • 4 account(s), 1677 edge(s)

Highest-priority account: acct_001 • Cluster score 659.16

Four connected bank accounts (acct_001, acct_002, acct_004, acct_007) show patterns of money trail tracing, cross-statement links, shared UPI identifiers, and first contact large transfers. These accounts are linked by 1677 edges and have a total score of 659.16. The top accounts (acct_001, acct_007, acct_002, acct_004) have distinct pattern counts ranging from 3 to 4 and total scores ranging from 119.62 to 218.38. The evidence groups show confidence tiers from 1 to 3, with finding counts of 1 and transaction ID counts ranging from 2 to 200.

Members: acct_001, acct_002, acct_004, acct_007

cluster_002 • 2 account(s), 631 edge(s)

Highest-priority account: upi-flipkart-flipkart@ybl-642171014480-dr • Cluster score 0.0

Two bank accounts, acct_003 and upi-flipkart-flipkart@ybl-642171014480-dr, are connected with a total of 631 transactions. The accounts show a pattern of first contact large transfer, with one transaction of 140633.04 on January 7, 2026, from upi-flipkart-flipkart@ybl-642171014480-dr to acct_003, and another transaction of 240.21 on the same day from acct_003 to upi-flipkart-flipkart@ybl-642171014480-dr. The evidence groups indicate a confidence tier of 3 for this pattern. The total score for these accounts is 0.0.

Members: acct_003, upi-flipkart-flipkart@ybl-642171014480-dr

2 • Input Summary

This report is based on 7 uploaded statement file(s) covering 5 account(s) and 5,481 transactions, spanning 2024-12-01 to 2026-05-09.

4 • Findings by Account

acct_001 WEAK

Rank #1

acct_001 · Federal Bank · Account Number 48880432099033 · Score 218

The account acct_001 is suspicious due to an extreme credit of €294000.24, which was fully allocated across 5 debits with no remaining untraced amount. This unusual money trail, combined with other patterns, warrants further investigation. The credited amount and subsequent debits suggest potentially coordinated transactions.

- Money Trail Tracing** STRONG — A credit of €294000.24 was made to account acct_001, which was then fully allocated across 5 debits with no remaining untraced amount, indicating a potentially suspicious money trail.
- Cross Statement Links** STRONG — A matched flow link between debit and credit transactions was found based on an exact reference match with a confidence score of 1.0, and a shared reference '49652837781' provides additional corroboration for the link.
- Shared Upi Identifiers** STRONG — The shared UPI identifier 'msedclpayment@upi' is used by 2 accounts, including acct_001, which may indicate coordination or shared control between these accounts.
- First Contact Large Transfer** STRONG — A large transfer of €283360.15 was made from acct_001 to acct_007 on 2025-08-08, notable due to the lack of prior transactions between the accounts.
- Money Flow Graph Construction** STRUCTURAL — A money-flow graph has been constructed with 2141 nodes and 3697 directed transaction edges, indicating a complex network of financial transactions across

multiple accounts, including acct_001, acct_002, acct_003, acct_004, and acct_007, with all transactions denominated in ₹ INR. The investigative significance of this finding lies in the potential for identifying patterns of money laundering or other illicit financial activities, given the high volume and complexity of transactions involved.

CIF No WEAK

acct_007 · State Bank of India · Account Number 96465802265 · Score 196

Rank #2

The account is suspicious due to large transfers and linked transactions between different accounts, including a cross-statement link with a confidence score of 1.0 and a large transfer of 284358.16 on 2025-08-09. The money flow behavior indicates a possible flow of funds between different accounts and individuals. This warrants further investigation to determine the legitimacy of these transactions.

- **Cross Statement Links** STRONG — A cross-statement link was found between debit and credit transactions with a shared reference '49652837781' on 2025-08-08, with a confidence score of 1.0. (+1 more of this type)
- **First Contact Large Transfer** STRONG — A large transfer of 284358.16 occurred on 2025-08-09 from acct_007 to acct_002, with no prior observed relationship between the accounts. (+1 more of this type)
- **Money Trail Tracing** STRONG — A credit transaction was followed by a debit transaction, indicating a possible flow of funds between different accounts and individuals, with a trigger reason of auto_strong_account_credit.
- **Shared Upi Identifiers** STRONG — The shared UPI identifier 'msedclpayment@upi' was found between acct_001 and acct_007, indicating possible coordination or shared control, with 2 accounts sharing the identifier out of 5 observed accounts.
- **Money Flow Graph Construction** STRUCTURAL — A money-flow graph with 2141 nodes and 3697 directed transaction edges was constructed, indicating a complex network of financial transactions across multiple accounts, including acct_001, acct_002, acct_003, acct_004, and acct_007.

GAURAV KHANNA WEAK

acct_002 · HDFC BANK LTD · Account Number 68699629400471 · Score 125

Rank #3

This account is suspicious due to a large transfer of ₹284358.16 from acct_007 to acct_002 on 2025-08-09 with no prior relationship. The money trail tracing pattern identified a credit transaction of ₹284358.16 allocated to two subsequent debit transactions. The account's high-throughput pass-through behavior and complex money flow graph also raise concerns.

- **First Contact Large Transfer** STRONG — A large transfer of ₹284358.16 occurred from acct_007 to acct_002 on 2025-08-09 with no prior relationship. (+1 more of this type)
- **Money Trail Tracing** STRONG — A credit transaction of ₹284358.16 was allocated to two subsequent debit transactions, leaving no remaining untraced amount.
- **Cross Statement Links** WEAK — A direct financial transaction occurred between acct_007 and acct_002, with a debit from acct_007 matching a credit to acct_002. (+1 more of this type)
- **Pass Through Routing Account** WEAK — Account acct_002 received ₹4419609.60 from 133 sources and disbursed ₹4258306.89 to 614 targets, retaining only 3.6% of inflow — consistent with high-throughput pass-through. The large number of transactions and low retention rate suggest that this account may be used for pass-through transactions, potentially indicating a money laundering scheme.
- **Money Flow Graph Construction** STRUCTURAL — A complex money flow graph was constructed with 2141 nodes and 3697 directed transaction edges across multiple accounts.

CIF No **WEAK**

acct_004 · UCO Bank · Account Number 6332927949015177 · Score 120

Rank #4

This account is suspicious due to a large transfer of ₹276578.67, which was fully allocated to a subsequent debit, and is the first observed transaction between the accounts. The transaction patterns indicate potential anomalies. The account's money flow graph also shows a complex network of transactions.

- **Money Trail Tracing** **STRONG** — A credited amount of ₹276578.67 was fully allocated to a debit of ₹289258.71, with the difference likely due to fees.
- **First Contact Large Transfer** **STRONG** — A large transfer of ₹276578.67 from acct_002 to acct_004 on 2025-08-10 is significant as it's the first observed transaction between these accounts.
- **Money Flow Graph Construction** **STRUCTURAL** — A money-flow graph with 2141 nodes and 3697 directed transaction edges indicates a complex network of financial transactions across multiple accounts.
- **Cross Statement Links** **WEAK** — A matched flow link between debit and credit transactions, with a corroboration path of a rare amount mirror match, suggests a potential financial relationship between two accounts.

5 • Money-Flow Graphs

Case Overview Graph

The graph shows 2 clusters of accounts with a total of 6 accounts and 2308 edges. Cluster cluster_001 has the largest number of edges with 1677 and the highest total score of 659.1584. An investigator should note the significant difference in total score between the two clusters and the shared pattern_id 19 between them.

Account Interconnection Graph

This static exhibit is filtered for legibility: it shows the material account-to-account relationships and only the most evidential external counterparties, while the full-density network remains available in the UI graph data.

Suspicious Activity Timeline

The graph shows 5481 transactions over a time span from 2024-12-01 to 2026-05-09, with no transactions excluded after being flagged, indicating a comprehensive view of the activity timeline. An investigator should note the total volume of transactions and the lack of excluded flagged transactions. The time span of approximately 1 year and 5 months is notable for its duration and consistency of activity.

Fraud-Pattern Summary

The graph shows a summary of fraud patterns with the most notable figures being 4 occurrences of 'Money Trail Tracing', 'First Contact Large Transfer', and 'Suspicious Account Ranking'. An investigator should take note of these patterns as they are the most frequent. The time span and largest transfers are not explicitly stated in the provided data, but the busiest patterns are clearly 'Money Trail Tracing', 'First Contact Large Transfer', and 'Suspicious Account Ranking' with 4 occurrences each.

6 • Final Summary

4 account(s) were ranked by composite suspicion score. The highest-scoring accounts show the broadest, strongest pattern evidence and warrant priority review.

Rank	Account Holder	Score	Key Concern
1	acct_001 (acct_001)	218	Money Trail Tracing
2	CIF No (acct_007)	196	Cross Statement Links
3	GAURAV KHANNA (acct_002)	125	First Contact Large Transfer
4	CIF No (acct_004)	120	Money Trail Tracing

Score legend

Score Range	What It Means
600+	Strong evidence across multiple independent pattern types — high investigative priority
300–599	Moderate evidence, worth follow-up but less urgent
Below 300	Weak or isolated signals, mostly for reference

Generated by the Survey Corps Investigation Engine for CIDECODE · Run run_20260704_045034 · 04 July 2026, 04:53. All findings are investigative leads requiring independent verification.

Data Security & Method (Appendix)

What stays on this machine

- All fraud detection, scoring and ranking run on this machine (deterministic code).
- Raw bank statements and extracted transactions never leave the machine.
- The money-flow graph, clusters and suspicion scores are computed locally.

What is sent to an external service

- Only small, redacted text samples are sent to the language model to describe a statement's column layout when local parsing is insufficient.
- For images / scanned PDFs, the page pixels are sent to a vision model (the one unavoidable case).
- The language model only rewrites explanations into plain language; it never changes a number, account, or decision.

Language-model calls this run: 17 · active
