FINANCIAL INVESTIGATION REPORT

Prepared by:

Survey Corps — Investigation Engine

Case reference: run_20260704_070808

Generated: 04 July 2026, 07:08

This report presents investigative leads based on transaction pattern analysis. It does not establish guilt — all findings should be independently verified before action.

Case Narrative

In brief, for the investigating officer:

- A total of Rs 4,641,574.39 moved across the accounts in this case, with Rs 2,427,030.55 coming from outside the suspect network.
- The account MS NARESH GHOSH with number 84975745891270 sent out Rs 2,214,543.84.
- MS NARESH GHOSH with account number 84975745891270 sent money to 415 different accounts.
- MS NARESH GHOSH with account number 84975745891270 received money from 105 different accounts.

1 • Case Reconstruction

The case contains 1 account cluster(s), with 0 account(s) ranked for suspicious activity. The highest-priority cluster is cluster_001 with total score 0.00.

1 CLUSTERS	1 CONNECTED CLUSTERS	0 ISOLATED CLUSTERS
---	---	--

cluster_001 · 2 account(s), 631 edge(s)

Highest-priority account: upi-flipkart-flipkart@ybl-642171014480-dr · Cluster score 0.0

Two bank accounts, acct_001 and upi-flipkart-flipkart@ybl-642171014480-dr, are connected with a total of 631 transactions. The accounts show a pattern of first contact large transfer, with one transaction of 140633.04 on January 7, 2026, from upi-flipkart-flipkart@ybl-642171014480-dr to acct_001, and another transaction of 240.21 on the same day from acct_001 to upi-flipkart-flipkart@ybl-642171014480-dr. The evidence groups indicate a confidence tier of 3 for this pattern. The total score for the cluster is 0.0.

Members: acct_001, upi-flipkart-flipkart@ybl-642171014480-dr

2 · Input Summary

This report is based on 1 uploaded statement file(s) covering 1 account(s) and 1,152 transactions, spanning 2024-12-01 to 2026-05-09.

Source Account ID	Account Number	Account Holder	Bank	IFSC
acct_001	84975745891270	MS NARESH GHOSH	HDFC Bank	HDFC0483564

3 · Analysis Summary

The engine ran 1 account(s) through the full deterministic detector suite and built a money-flow graph of 490 nodes and 631 transaction edges.

1 ACCOUNTS ANALYSED	1,152 TRANSACTIONS	54.8% COUNTERPARTIES RESOLVED
0 ACCOUNTS FLAGGED		

No balance inconsistencies detected in this dataset.

4 · Findings by Account

No accounts met the criteria for investigative flagging in this run.

5 · Money-Flow Graphs

Case Overview Graph

The graph shows a case-wide overview with one node per reconstructed cluster, focusing on a single cluster with 2 accounts and 631 edges. The most notable figure is the large number of edges, indicating a high volume of transactions between these accounts. An investigator should take note of the single cluster and its associated pattern ID 19, which may suggest a significant and cohesive financial activity pattern within the time span of the case.

Account Interconnection Graph

This static exhibit is filtered for legibility: it shows the material account-to-account relationships and only the most evidential external counterparties, while the full-density network remains available in the UI graph data.

Suspicious Activity Timeline

The graph shows 1152 transactions over a time span from 2024-12-01 to 2026-05-09, with no transactions flagged or excluded. An investigator should note the total volume of transactions and the absence of any flagged activity. The time span of the graph covers approximately 1 year and 5 months, indicating a long-term pattern of activity.

Fraud-Pattern Summary

The graph shows 5 distinct patterns, with the most notable being that each pattern, including Duplicate Verification, Money Flow Graph Construction, Money Trail Tracing, First Contact Large Transfer, and Llm Investigated Anomalies, occurs exactly 1 time. An investigator should take note that all patterns have the same frequency, indicating a potential uniformity in the fraud patterns observed. The time span and largest transfers are not directly inferable from the given data, but the uniform pattern counts suggest a need for further investigation into each type.

6 • Final Summary

No accounts met the criteria for investigative flagging in this run.

Score legend

Score Range	What It Means
600+	Strong evidence across multiple independent pattern types — high investigative priority
300–599	Moderate evidence, worth follow-up but less urgent
Below 300	Weak or isolated signals, mostly for reference

Generated by the Survey Corps Investigation Engine for CIDECODE · Run run_20260704_070808 · 04 July 2026, 07:08. All findings are investigative leads requiring independent verification.

Data Security & Method (Appendix)

What stays on this machine

- All fraud detection, scoring and ranking run on this machine (deterministic code).
- Raw bank statements and extracted transactions never leave the machine.
- The money-flow graph, clusters and suspicion scores are computed locally.

What is sent to an external service

- Only small, redacted text samples are sent to the language model to describe a statement's column layout when local parsing is insufficient.
- For images / scanned PDFs, the page pixels are sent to a vision model (the one unavoidable case).
- The language model only rewrites explanations into plain language; it never changes a number, account, or decision.

Language-model calls this run: 5 · active
