FINANCIAL INVESTIGATION REPORT

Prepared by:

Survey Corps — Investigation Engine

Case reference: run_20260704_085417

Generated: 04 July 2026, 09:02

This report presents investigative leads based on transaction pattern analysis. It does not establish guilt — all findings should be independently verified before action.

Case Narrative

In brief, for the investigating officer:

- A total of Rs 19,045,588.07 moved across the accounts in this case, with Rs 7,352,784.69 coming from outside the suspect network.
- SUSHMA DUBEY sent out Rs 2,565,987.23, making it the largest source of funds.
- SONIA RAO sent money to 616 different accounts.
- AKASH GHOSH received money from 143 different accounts.
- Rs 464,000.95 of the incoming funds was used for onward transfers or withdrawals.
- The account of ARCHANA SEN is the first to investigate due to its suspicious behaviors.

Key Concern: Money Flow Graph Construction

A money-flow graph has been constructed with 1932 nodes and 3815 directed transaction edges, indicating a complex network of financial transactions across the five accounts: acct_001, acct_002, acct_003, acct_004, and acct_005. The investigative significance of this finding lies in the potential for identifying patterns of money laundering or other illicit financial activities, given the high volume and complexity of transactions involved.

1 · Case Reconstruction

The case contains 3 account cluster(s), with 1 account(s) ranked for suspicious activity. The highest-priority cluster is cluster_003 with total score 68.00.

3

CLUSTERS

3

CONNECTED CLUSTERS

0

ISOLATED CLUSTERS

cluster_001 · 3 account(s), 910 edge(s)

Highest-priority account: acct_004 · Cluster score 0.0

The data shows a cluster of 3 connected bank accounts (acct_001, acct_002, acct_004) with 910 relationships and 51 transactions. These accounts share UPI identifiers, which is the basis for the pattern evidence. The accounts are linked by a single evidence group with a confidence tier of 3. The highest priority account is acct_004.

Members: acct_001, acct_002, acct_004

cluster_002 · 1 account(s), 741 edge(s)

Highest-priority account: acct_003 · Cluster score 0.0

cluster_002 contains 1 connected account(s) and 741 transaction edge(s). The cluster evidence includes no scored pattern.

Members: acct_003

cluster_003 · 1 account(s), 324 edge(s)

Highest-priority account: acct_005 · Cluster score 68.0

cluster_003 contains 1 connected account(s) and 324 transaction edge(s). The cluster evidence includes money_trail_tracing.

Members: acct_005

2 · Input Summary

This report is based on 5 uploaded statement file(s) covering 5 account(s) and 5,375 transactions, spanning 2024-12-01 to 2026-05-09.

Source Account ID	Account Number	Account Holder	Bank	IFSC
acct_001	3851062425	MUKESH NAIK	KOTAK MAHINDRA BANK LTD	KKBK0272947

4 · Findings by Account

ARCHANA SEN

WEAK

Rank #1

acct_005 · Unknown Bank · Account Number 08959469915 · Score 68

This account is suspicious due to its complex network of financial transactions and a large credit amount. The money-flow graph constructed with 1932 nodes and 3815 directed transaction edges indicates potential money laundering activities. The large credit of £6400.95 on 2025-09-22 is particularly noteworthy.

- Money Flow Graph Construction** **STRUCTURAL** — A money-flow graph with 1932 nodes and 3815 directed transaction edges was constructed across five accounts, indicating a complex network of financial transactions.
- Money Trail Tracing** **WEAK** — A credit of £6400.95 was made to account acct_005 on 2025-09-22, which was then traced into 101 subsequent debit transactions, primarily to various UPI transactions.

Supporting transactions

Date	Type	Amount	Counterparty	Reference
2025-03-02	Debit	Rs 21,850.36	isha.singh@okhdfcbank	097493793833
2025-10-28	Debit	Rs 21,750.51	8491423853@ptaxis	974334066646
2025-01-15	Debit	Rs 21,700.60	anjali.yadav@upi	908898315251
2025-01-30	Credit	Rs 21,700.31	vandana809@paytm	002505758034
2025-10-04	Debit	Rs 21,450.23	nikhil.gupta@ptaxis	107234659191
2025-01-16	Credit	Rs 21,450.02	rohit109@okaxis	125657200594
2026-01-08	Debit	Rs 21,350.91	gauravpand61@pthdfc	105576485990
2025-12-28	Debit	Rs 21,300.53	sangita822@okaxis	199736536493

Assessment: 1 strong pattern type(s) and 1 distinct pattern(s) — weak evidence.

5 · Money-Flow Graphs

Case Overview Graph

The graph shows a case-wide overview with 3 clusters, the busiest being cluster_001 with 910 edges and cluster_002 with 741 edges. Cluster_003 has the highest total score of 68.0. An investigator should note the significant number of edges in clusters 001 and 002, spanning across 3 and 1 accounts respectively, and the notable total score in cluster_003.

Account Interconnection Graph

This static exhibit is filtered for legibility: it shows the material account-to-account relationships and only the most evidential external counterparties, while the full-density network remains available in the UI graph data.

Suspicious Activity Timeline

The graph shows 5375 transactions over a time span from 2024-12-01 to 2026-05-09, with no flagged transactions excluded. The most notable figure is the total number of transactions, indicating a high volume of activity. An investigator should take note of the extensive time period and the large number of transactions to identify potential patterns or anomalies.

Fraud-Pattern Summary

The graph shows 1 instance of Duplicate Verification, 1 instance of Money Flow Graph Construction, 1 instance of Money Trail Tracing, 1 instance of Shared Upi Identifiers, and 1 instance of Llm Investigated Anomalies, indicating a single occurrence of each pattern, with no notable large transfers or busy patterns, spanning an unspecified time period, suggesting an investigator should look into these isolated incidents for potential fraud.

6 · Final Summary

1 account(s) were ranked by composite suspicion score. The highest-scoring accounts show the broadest, strongest pattern evidence and warrant priority review.

Rank	Account Holder	Score	Key Concern
1	ARCHANA SEN (acct_005)	68	Money Flow Graph Construction

Score legend

Score Range	What It Means
600+	Strong evidence across multiple independent pattern types — high investigative priority
300–599	Moderate evidence, worth follow-up but less urgent
Below 300	Weak or isolated signals, mostly for reference

Generated by the Survey Corps Investigation Engine for CIDECODE · Run run_20260704_085417 · 04 July 2026, 09:02. All findings are investigative leads requiring independent verification.

Data Security & Method (Appendix)

What stays on this machine

- All fraud detection, scoring and ranking run on this machine (deterministic code).
- Raw bank statements and extracted transactions never leave the machine.
- The money-flow graph, clusters and suspicion scores are computed locally.

What is sent to an external service

- Only small, redacted text samples are sent to the language model to describe a statement's column layout when local parsing is insufficient.
- For images / scanned PDFs, the page pixels are sent to a vision model (the one unavoidable case).
- The language model only rewrites explanations into plain language; it never changes a number, account, or decision.

Language-model calls this run: 6 · active
