FINANCIAL INVESTIGATION REPORT

Prepared by:

Survey Corps — Investigation Engine

Case reference: run_20260704_151040

Generated: 04 July 2026, 15:11

This report presents investigative leads based on transaction pattern analysis. It does not establish guilt — all findings should be independently verified before action.

Case Narrative

In brief, for the investigating officer:

- A total of Rs 403,685.13 moved across the accounts in this case.
- The largest source of funds was PRIME DISTRIBUTORS ASSOCIATION, which sent out Rs 282,382.00.
- The email banker@idfcfirstbank.com received money from 3 different accounts.
- Rs 11,281,000.00 of incoming funds was used for onward transfers or withdrawals.
- The account to investigate first is STAR RETAIL LLP, which shows the strongest suspicious behaviours in this case.

1

CONNECTED CLUSTERS

0

ISOLATED CLUSTERS

cluster_001 · 3 account(s), 3 edge(s)

Highest-priority account: acct_001 · Cluster score 806.24

The data shows connections between three bank accounts (acct_001, acct_002, acct_003) with multiple patterns of activity, including duplicate verification, money trail tracing, and round value debit patterns. These accounts have a total of 13 subcases and 6 distinct patterns. The highest priority account is acct_001, with a total score of 320.8199. The accounts have various confidence tiers and transaction counts associated with each pattern. The data also indicates the presence of reversal clusters and failed reversed transaction detection in some accounts.

Members: acct_001, acct_002, acct_003

2 · Input Summary

This report is based on 3 uploaded statement file(s) covering 3 account(s) and 543 transactions, spanning 2025-03-20 to 2025-07-18.

Source Account ID	Account Number	Account Holder	Bank	IFSC
acct_001	00869354051	STAR RETAIL LLP	IDFC First Bank	IDFB0041359

4 · Findings by Account

STAR RETAIL LLP

MODERATE

Rank #1

acct_001 · IDFC First Bank · Account Number 00869354051 · Score 321

Account acct_001 exhibits suspicious money behavior, with a large credit of 2600000.00 traced into 8 subsequent debits, and a UPI identifier shared across 3 accounts. This indicates potential coordinated activity or shared ownership. The account also shows other unusual patterns, such as round-value debits and systematic transaction reversals.

- Money Trail Tracing**

STRONG

 — A credit of 2600000.00 on 2025-05-06 was traced into 8 subsequent debits, with 0.00 remaining untraced, indicating a potentially suspicious money trail. (+1 more of this type)
- Shared Upi Identifiers**

STRONG

 — The UPI identifier 'banker@idfcfirstbank.com' appears across 3 accounts, suggesting possible shared ownership or coordinated activity among acct_001, acct_002, and acct_003.
- Duplicate Verification**

WEAK

 — A possible extraction false positive occurred due to a lack of corroborating match for a flagged duplicate transaction in account acct_001. (+10 more of this type)
- Money Flow Graph Construction**

STRUCTURAL

 — A money-flow graph with 4 nodes and 3 directed transaction edges was constructed, indicating potential complex transaction relationships among accounts.
- Reversal Clusters**

WEAK

 — Account acct_001 has 3 debit-reversal pairs, indicating systematic transaction reversal activity, which may be suspicious.
- Round Value Debit Patterns**

WEAK

 — Account acct_001 made 3 suspicious round-value debits totalling 1452000.00, which may indicate structured or laundered transactions.

Supporting transactions

Date	Type	Amount	Counterparty	Reference
2025-06-23	Debit	Rs 50,492.00	banker@idfcfirstbank.com	00869354051

Assessment: 2 strong pattern type(s) and 5 distinct pattern(s) — moderate evidence.

PIONEER HOLDINGS

WEAK

Rank #2

acct_002 · IDFC First Bank · Account Number 17771917925 · Score 265

This account is suspicious due to a large credit transaction of 2760000.00, which was subsequently debited in 11 transactions, and the presence of shared UPI identifiers across multiple accounts. The account's money flow

behavior and duplicate verification patterns also raise concerns. The combination of these factors contributes to the account's high score of 265 and strong evidence strength.

- **Money Trail Tracing** **STRONG** — A credit transaction of 2760000.00 was traced into 11 subsequent debit transactions, with 0.00 remaining untraced, indicating a potentially suspicious money trail. (+1 more of this type)
- **Shared Upi Identifiers** **STRONG** — The UPI identifier 'banker@idfcfirstbank.com' appears across 3 different accounts, suggesting possible shared ownership or coordinated activity.
- **Duplicate Verification** **WEAK** — Transactions have a high confidence score of 1.0, indicating potential duplicates, and weak evidence strength, requiring further review. (+4 more of this type)
- **Money Flow Graph Construction** **STRUCTURAL** — A money-flow graph with 4 nodes and 3 directed transaction edges was constructed, indicating a complex transaction pattern.
- **Round Value Debit Patterns** **WEAK** — Account made 4 suspicious round-value debits totalling 2582000.00, which may indicate a pattern of high-value transactions.

Supporting transactions

Date	Type	Amount	Counterparty	Reference
2025-06-13	Debit	Rs 70,811.13	banker@idfcfirstbank.com	32905250030839

Assessment: 2 strong pattern type(s) and 4 distinct pattern(s) — weak evidence.

PRIME DISTRIBUTORS ASSOCIATION **WEAK**

acct_003 · IDFC First Bank · Account Number 18306700003 · Score 220

Rank #3

This account is suspicious due to a large credit transaction of 2000000.00, which was subsequently debited in a pattern that suggests potential money laundering or other illicit activity. The presence of shared UPI identifiers across multiple accounts also raises concerns about coordinated activity or shared ownership. The combination of these factors warrants further investigation.

- **Money Trail Tracing** **STRONG** — A credit transaction of 2000000.00 on 2025-04-03 was traced into 6 subsequent debits, with the entire amount allocated and no remaining balance, indicating a potential money trail.
- **Shared Upi Identifiers** **STRONG** — The UPI identifier 'banker@idfcfirstbank.com' appears across 3 different accounts, suggesting possible shared ownership or coordinated activity among these accounts.
- **Duplicate Verification** **WEAK** — A duplicate transaction was flagged but not corroborated by an independent account/amount/date/narration cross-check, potentially indicating an extraction false positive. (+9 more of this type)
- **Failed Reversed Transaction Detection** **WEAK** — A debit of 500000.0 was followed by a near-equal credit of 500000.0 with explicit reversal/reference evidence, suggesting a potential failed reversed transaction.
- **Money Flow Graph Construction** **STRUCTURAL** — A money-flow graph was constructed with 4 nodes and 3 directed transaction edges, indicating a structured pattern of transactions among the accounts.
- **Reversal Clusters** **WEAK** — Account acct_003 has 5 debit-reversal pairs, indicating systematic transaction reversal activity that may be suspicious.

- **Round Value Debit Patterns** **WEAK** — Account acct_003 made 7 suspicious round-value debits totaling 3620000.00, with repeated amounts, such as 500,000 x3, suggesting a potential pattern of round-value transactions.

Supporting transactions

Date	Type	Amount	Counterparty	Reference
2025-07-18	Debit	Rs 282,382.00	banker@idfcfirstbank.com	18306700003

Assessment: 1 strong pattern type(s) and 6 distinct pattern(s) — weak evidence.

5 · Money-Flow Graphs

Case Overview Graph

The graph shows a case-wide overview with 1 cluster, containing 3 accounts and 3 edges, with a total score of 806.2352. The cluster has pattern IDs 1, 2, 8, 14, 15, and 16. An investigator should note the total score and the specific pattern IDs to understand the money flow. The single cluster suggests a relatively simple money flow pattern.

Account Interconnection Graph

This static exhibit is filtered for legibility: it shows the material account-to-account relationships and only the most evidential external counterparties, while the full-density network remains available in the UI graph data.

Suspicious Activity Timeline

The graph shows 543 transactions over a period from 2025-03-20 to 2025-07-18. An investigator should note the total number of transactions and the time span of approximately 4 months. The fact that 0 transactions were flagged and excluded is also notable. This information can help an investigator understand the scope of the suspicious activity timeline.

Fraud-Pattern Summary

The graph shows various fraud patterns, with the most notable being Duplicate Verification, which occurred 26 times. The busiest pattern is Duplicate Verification, while other patterns like Failed Reversed Transaction Detection and Llm Investigated Anomalies occurred only 1 time. An investigator should take note of the high frequency of Duplicate Verification and the relatively low occurrence of other patterns. The data spans a range of 8 different patterns.

6 • Final Summary

3 account(s) were ranked by composite suspicion score. The highest-scoring accounts show the broadest, strongest pattern evidence and warrant priority review.

Rank	Account Holder	Score	Key Concern
1	STAR RETAIL LLP (acct_001)	321	Money Trail Tracing
2	PIONEER HOLDINGS (acct_002)	265	Money Trail Tracing
3	PRIME DISTRIBUTORS ASSOCIATION (acct_003)	220	Money Trail Tracing

Score legend

Score Range	What It Means
600+	Strong evidence across multiple independent pattern types — high investigative priority
300–599	Moderate evidence, worth follow-up but less urgent
Below 300	Weak or isolated signals, mostly for reference

Generated by the Survey Corps Investigation Engine for CIDECODE · Run run_20260704_151040 · 04 July 2026, 15:11. All findings are investigative leads requiring independent verification.

Data Security & Method (Appendix)

What stays on this machine

- All fraud detection, scoring and ranking run on this machine (deterministic code).
- Raw bank statements and extracted transactions never leave the machine.
- The money-flow graph, clusters and suspicion scores are computed locally.

What is sent to an external service

- Only small, redacted text samples are sent to the language model to describe a statement's column layout when local parsing is insufficient.
- For images / scanned PDFs, the page pixels are sent to a vision model (the one unavoidable case).
- The language model only rewrites explanations into plain language; it never changes a number, account, or decision.

Language-model calls this run: 16 · active
