FINANCIAL INVESTIGATION REPORT

Prepared by:

Survey Corps — Investigation Engine

Case reference: run_20260704_155532

Generated: 04 July 2026, 16:00

This report presents investigative leads based on transaction pattern analysis. It does not establish guilt — all findings should be independently verified before action.

Case Narrative

In brief, for the investigating officer:

- A total of Rs 16,013,929.84 moved across the accounts in this case.
- The largest source of funds was ASHISH DESAI, which sent out Rs 2,962,478.73.
- ASHISH DESAI spread money to 199 different accounts.
- ASHISH DESAI collected money from 141 different accounts.
- Rs 754,676.56 of incoming funds was traced to onward transfers or withdrawals.
- The account to investigate first is ASHISH DESAI, it shows the strongest combination of suspicious behaviors in this case.

INVESTIGATE FIRST

Prime Suspects — Investigate First

The highest-priority accounts in this case, in order:

#1 • ASHISH DESAI (98036543420467) WEAK • Score 161 Key Concern: Round Trip Detection An investigation has revealed a round-trip transaction pattern between accounts acct_002 and acct_004, with ₹400000.25 and ₹354676.31 being transferred in a short span of 2 days, indicating a potential money laundering scheme. The investigative significance of this finding lies in the rare amount mirror match corroboration path, which suggests a deliberate attempt to conceal the origin and destination of the funds. The confidence score of 0.65 and corroboration path of rare_amount_mirror_match further support the validity of this finding.
#2 • CIF No (4258497598930953) WEAK • Score 160 Key Concern: Money Trail Tracing An initial credit of ₹400000.25 was made to account acct_004 on 2025-05-19 from ASHISH DESAI via NEFT, which was then traced through 11 subsequent debit transactions. The debits included payments to various parties such as Flipkart, ASHISH DESAI, Sunita, Airtel, KSEB, and Indian Oil, among others, with the money trail being exhausted after these transactions. Notably, the transaction to ASHISH DESAI on 2025-05-21 for ₹354676.31 is significant as it indicates a substantial transfer to an individual, highlighting the complexity of the money trail. The entire amount of ₹400000.25 was allocated, leaving no remaining untraced balance.

4 · Findings by Account

ASHISH DESAI

WEAK

Rank #1

acct_002 · BANDHAN BANK LIMITED · Account Number 98036543420467 · Score 161

The account acct_002 is suspicious due to its involvement in a round-trip transaction pattern with acct_004, with large transfers of €400000.25 and €354676.31 in a short span, indicating a potential money laundering scheme. The account's behavior, including large transfers and complex transaction networks, warrants further investigation. The rare amount mirror match corroboration path and high confidence score of 0.65 support the validity of these findings.

- Round Trip Detection** **STRONG** — A round-trip transaction pattern occurred between accounts acct_002 and acct_004, with €400000.25 and €354676.31 transferred in 2 days, indicating a potential money laundering scheme.
- First Contact Large Transfer** **STRONG** — On 2025-05-19, a large transfer of €400000.25 from acct_002 to acct_004 occurred with no prior transactions between the accounts.
- Cross Statement Links** **WEAK** — A debit of €400000.25 from acct_002 to a credit of €400000.25 in acct_004 on 2025-05-19 indicates a matched flow link, suggesting a potential money trail. (+1 more of this type)
- Money Flow Graph Construction** **STRUCTURAL** — A money-flow graph with 1185 nodes and 3034 directed transaction edges reveals a complex network of financial transactions between accounts acct_001, acct_002, acct_003, and acct_004.

- **Money Trail Tracing** **WEAK** — The credit amount of €354676.31 was traced into 79 debit transactions, providing insights into the money trail and potential areas of suspicious activity.

Supporting transactions

Date	Type	Amount	Counterparty	Reference
2025-05-19	Debit	Rs 400,000.25	CIF No	N94773093765
2025-05-21	Credit	Rs 354,676.31	CIF No	00293152286

2025-03-08	Debit	Rs 21,800.08	amitshar97@pthdfc	497372666582

Assessment: 2 strong pattern type(s) and 4 distinct pattern(s) — weak evidence.

CIF No **WEAK**

acct_004 · Bank of India · Account Number 4258497598930953 · Score 160

Rank #2

This account is suspicious due to a large initial credit of ₹400000.25 and subsequent complex money trail through 11 debit transactions. The transactions involve various parties and indicate potential money laundering. The entire amount was allocated, leaving no remaining untraced balance.

- **Money Trail Tracing** **STRONG** — An initial credit of ₹400000.25 was made to account acct_004 on 2025-05-19 from ASHISH DESAI via NEFT, which was then traced through 11 subsequent debit transactions, indicating a complex money trail.
- **Round Trip Detection** **STRONG** — A round-trip transaction pattern was detected between accounts acct_002 and acct_004, with ₹400000.25 and ₹354676.31 being transferred in a short span of 2 days, indicating a potential money laundering scheme.
- **First Contact Large Transfer** **STRONG** — A large transfer of ₹400000.25 from acct_002 to acct_004 on 2025-05-19 is notable due to the lack of prior transactions between the two accounts, suggesting a suspicious first contact large transfer.
- **Cross Statement Links** **WEAK** — A debit of ₹400000.25 from account acct_002 to a credit of ₹400000.25 in account acct_004 on 2025-05-19 indicates a matched flow link, suggesting a potential money trail between the two accounts. (+1 more of this type)
- **Money Flow Graph Construction** **STRUCTURAL** — A money-flow graph with 1185 nodes and 3034 directed transaction edges was constructed, indicating a complex network of financial transactions between the accounts, revealing a large and intricate pattern of money flow.

5 · Money-Flow Graphs

Case Overview Graph

The graph shows a case-wide overview of 3 clusters, with cluster_001 being the most notable due to its 2 accounts, 697 edges, and a total score of 321.6198. Cluster_001 also contains pattern_ids 8, 10, 17, and 19. An investigator should take note of cluster_001's high edge count and total score, indicating a significant amount of activity within this cluster. The time span and largest transfers are not explicitly stated in the data.

Account Interconnection Graph

This static exhibit is filtered for legibility: it shows the material account-to-account relationships and only the most evidential external counterparties, while the full-density network remains available in the UI graph data.

Suspicious Activity Timeline

The graph shows a timeline of suspicious activity from 2024-12-01 to 2026-05-09, covering a total of 4292 transactions. The most notable figure is the total number of transactions, which is 4292. An investigator should take note that no transactions were flagged and excluded, indicated by 0 flagged_excluded, over the approximately 1.5-year time span.

Fraud-Pattern Summary

The graph shows a summary of fraud patterns with 1 instance of Duplicate Verification, 1 instance of Money Flow Graph Construction, and 2 instances of both Money Trail Tracing and Cross Statement Links. The most notable figures include 2 instances of Suspicious Account Ranking. An investigator should take note of these patterns, particularly the repeated occurrences of Money Trail Tracing and Cross Statement Links, which may indicate a busy pattern of fraudulent activity.

6 · Final Summary

2 account(s) were ranked by composite suspicion score. The highest-scoring accounts show the broadest, strongest pattern evidence and warrant priority review.

Rank	Account Holder	Score	Key Concern
1	ASHISH DESAI (acct_002)	161	Round Trip Detection
2	CIF No (acct_004)	160	Money Trail Tracing

Score legend

Score Range	What It Means
600+	Strong evidence across multiple independent pattern types — high investigative priority
300–599	Moderate evidence, worth follow-up but less urgent
Below 300	Weak or isolated signals, mostly for reference

Generated by the Survey Corps Investigation Engine for CIDECODE · Run run_20260704_155532 · 04 July 2026, 16:00. All findings are investigative leads requiring independent verification.

Data Security & Method (Appendix)

What stays on this machine

- All fraud detection, scoring and ranking run on this machine (deterministic code).
- Raw bank statements and extracted transactions never leave the machine.
- The money-flow graph, clusters and suspicion scores are computed locally.

What is sent to an external service

- Only small, redacted text samples are sent to the language model to describe a statement's column layout when local parsing is insufficient.
- For images / scanned PDFs, the page pixels are sent to a vision model (the one unavoidable case).
- The language model only rewrites explanations into plain language; it never changes a number, account, or decision.

Language-model calls this run: 10 · partial_failure
