FINANCIAL INVESTIGATION REPORT

Prepared by:

Survey Corps — Investigation Engine

Case reference: run_20260704_164342

Generated: 04 July 2026, 16:45

This report presents investigative leads based on transaction pattern analysis. It does not establish guilt — all findings should be independently verified before action.

Case Narrative

In brief, for the investigating officer:

- A total of Rs 11,584,477.51 moved across the accounts in this case, with Rs 4,346,852.39 coming from outside the suspect network.
- SUSHMA DUBEY sent out Rs 2,565,987.23, which was the largest source of funds.
- SONIA RAO sent money to 616 different accounts.
- AKASH GHOSH received money from 143 different accounts.

1 · Case Reconstruction

The case contains 2 account cluster(s), with 0 account(s) ranked for suspicious activity. The highest-priority cluster is cluster_002 with total score 0.00.

2

CLUSTERS

2

CONNECTED CLUSTERS

0

ISOLATED CLUSTERS

cluster_001 · 1 account(s), 741 edge(s)

Highest-priority account: SONIA RAO (85173206686139) · Cluster score 0.0

cluster_001 contains 1 connected account(s) and 741 transaction edge(s). The cluster evidence includes no scored pattern.

Members: SONIA RAO (85173206686139)

cluster_002 · 2 account(s), 697 edge(s)

Highest-priority account: AKASH GHOSH (97556000042808) · Cluster score 0.0

The data shows two connected bank accounts, SUSHMA DUBEY (8008270503) and AKASH GHOSH (97556000042808), with 34 transactions and a pattern of shared UPI identifiers. These accounts are part of a cluster with 697 edges and one evidence group. The pattern was detected with a confidence tier of 3. The accounts have a total of 0 distinct patterns and 0 strong patterns. The data does not provide any information about the accounts' scores or omitted members.

Members: SUSHMA DUBEY (8008270503), AKASH GHOSH (97556000042808)

2 · Input Summary

This report is based on **3** uploaded statement file(s) covering **3** account(s) and **3,277** transactions, spanning 2024-12-01 to 2026-05-09.

Source Account ID	Account Number	Account Holder	Bank	IFSC
acct_001	8008270503	SUSHMA DUBEY	KOTAK MAHINDRA BANK LTD	KKBK0995220
acct_002	85173206686139	SONIA RAO	HDFC BANK LTD	HDFC0874946
acct_003	97556000042808	AKASH GHOSH	THE FEDERAL BANK LIMITED	FDRL0087338

3 · Analysis Summary

The engine ran 3 account(s) through the full deterministic detector suite and built a money-flow graph of 1,364 nodes and 2,311 transaction edges.

3 ACCOUNTS ANALYSED	3,277 TRANSACTIONS	70.5% COUNTERPARTIES RESOLVED
0 ACCOUNTS FLAGGED		

No balance inconsistencies detected in this dataset.

4 · Findings by Account

No accounts met the criteria for investigative flagging in this run.

5 · Money-Flow Graphs

Case Overview Graph

The graph shows 2 clusters with a total of 3 accounts and 1438 edges. The most notable figures are cluster_001 with 741 edges and cluster_002 with 697 edges. An investigator should take note of the high number of edges in both clusters, indicating busy patterns of transactions. The time span is not specified in the provided data.

Account Interconnection Graph

This static exhibit is filtered for legibility: it shows the material account-to-account relationships and only the most evidential external counterparties, while the full-density network remains available in the UI graph data.

Suspicious Activity Timeline

The graph shows 3277 transactions over a time span from 2024-12-01 to 2026-05-09, with no flagged transactions excluded. The most notable figure is the total number of transactions, indicating a high volume of activity. An investigator should take note of the entire timeline to identify any patterns or anomalies within this period.

Fraud-Pattern Summary

The graph shows 1 instance of Duplicate Verification, 1 instance of Money Flow Graph Construction, 1 instance of Money Trail Tracing, 1 instance of Shared Upi Identifiers, and 1 instance of Llm Investigated Anomalies, indicating a single occurrence of each pattern. The most notable figure is the presence of each pattern once. An investigator should take note that all patterns occurred only once. The time span is not specified in the provided data.

6 · Final Summary

No accounts met the criteria for investigative flagging in this run.

Score legend

Score Range	What It Means
600+	Strong evidence across multiple independent pattern types — high investigative priority
300–599	Moderate evidence, worth follow-up but less urgent
Below 300	Weak or isolated signals, mostly for reference

Generated by the Survey Corps Investigation Engine for CIDECODE · Run run_20260704_164342 · 04 July 2026, 16:45. All findings are investigative leads requiring independent verification.

Data Security & Method (Appendix)

What stays on this machine

- All fraud detection, scoring and ranking run on this machine (deterministic code).
- Raw bank statements and extracted transactions never leave the machine.
- The money-flow graph, clusters and suspicion scores are computed locally.

What is sent to an external service

- Only small, redacted text samples are sent to the language model to describe a statement's column layout when local parsing is insufficient.
- For images / scanned PDFs, the page pixels are sent to a vision model (the one unavoidable case).
- The language model only rewrites explanations into plain language; it never changes a number, account, or decision.

Language-model calls this run: 5 · active
