FINANCIAL INVESTIGATION REPORT

Prepared by:

Survey Corps — Investigation Engine

Case reference: run_20260704_170513

Generated: 04 July 2026, 17:06

This report presents investigative leads based on transaction pattern analysis. It does not establish guilt — all findings should be independently verified before action.

Case Narrative

In brief, for the investigating officer:

- A total of Rs 44,450.00 moved across the accounts in this case, with Rs 34,750.00 coming from outside the suspect network.
- The largest source of funds was gatreddy@ok, which sent out Rs 15,150.00.
- The account 763010062770 sent money to 5 different accounts.
- The account MR. ANUPDUBEY received money from 6 different accounts.
- Rs 1,776,949.96 of the incoming funds were traced to onward transfers or withdrawals, while Rs 442,450.04 could not be fully traced.
- The account KAMALESH SUBHASH INAMDAR is the first to investigate due to its suspicious behaviors.

CONNECTED CLUSTERS

1

ISOLATED CLUSTERS

cluster_001 · 1 account(s), 6 edge(s)

Highest-priority account: MR. ANUPDUBEY (50100158077633) · Cluster score 0.0

cluster_001 contains 1 connected account(s) and 6 transaction edge(s). The cluster evidence includes no scored pattern.

Members: MR. ANUPDUBEY (50100158077633)

cluster_002 · 1 account(s), 7 edge(s)

Highest-priority account: 763010062770 · Cluster score 0.0

cluster_002 contains 1 connected account(s) and 7 transaction edge(s). The cluster evidence includes duplicate_verification, round_value_debit_patterns.

Members: 763010062770

Accounts with no established connections in this case

cluster_003

Account KMALESH SUBHASH INAMDAR (1357102000000198) was evaluated as an isolated account with no established transactional link to other accounts in this case. It was associated with duplicate_verification, money_trail_tracing, round_value_debit_patterns, structuring_smurfing_detection.

KMALESH SUBHASH INAMDAR (1357102000000198)

2 · Input Summary

This report is based on 3 uploaded statement file(s) covering 3 account(s) and 1,307 transactions, spanning 2017-04-05 to 2021-03-31.

Source Account ID	Account Number	Account Holder	Bank	IFSC
acct_001	763010062770	—	Unknown Bank	UNKNOWN
acct_002	50100158077633	MR. ANUPDUBEY	HDFC Bank	HDFC0001116
acct_003	1357102000000198	KMALESH SUBHASH INAMDAR	Unknown Bank	UNKNOWN

3 · Analysis Summary

The engine ran 3 account(s) through the full deterministic detector suite and built a money-flow graph of 14 nodes and 13 transaction edges.

ACCOUNTS FLAGGED

21 transactions were excluded from analysis due to balance inconsistencies identified during extraction.

4 · Findings by Account

KAMALESH SUBHASH INAMDAR

STRONG

Rank #1

acct_003 · Unknown Bank · Account Number 1357102000000198 · Score 1,003

The account of KAMALESH SUBHASH INAMDAR (1357102000000198) is suspicious due to a large credit transaction of 560000.00 on 2021-03-22, which was subsequently allocated to 7 debit transactions. This pattern, combined with other findings, suggests potential money laundering activity. The account's transactions exhibit structuring and smurfing behaviors, further indicating suspicious financial activity.

- Money Trail Tracing** STRONG — A credit transaction of 560000.00 on 2021-03-22 was traced into 7 subsequent debit transactions, with the entire amount allocated and no remaining balance. (+7 more of this type)
- Structuring Smurfing Detection** STRONG — On 2020-04-28, 7 debit transactions totaling 75550.00 were made, with each transaction below the individual cutoff but collectively exceeding it. (+4 more of this type)
- Duplicate Verification** WEAK — Similar transactions were flagged for further review due to their similarities, with a narration similarity of 0.8709677419354839 and same reference but different counterparty. (+31 more of this type)
- Money Flow Graph Construction** STRUCTURAL — A money-flow graph was constructed with 14 nodes and 13 directed transaction edges, indicating a complex transaction pattern with high confidence score of 1.0.
- Round Value Debit Patterns** WEAK — 4 suspicious round-value debits totaling 587000.00 were made, with all debits being multiples of 1000, suggesting potential structuring activity.

Assessment: 5 strong pattern type(s) and 4 distinct pattern(s) — strong evidence.

5 · Money-Flow Graphs

Case Overview Graph

The graph shows 3 clusters with a total of 14 edges, spanning across the case. The most notable cluster is cluster_003 with a total score of 1003.2375. An investigator should take note of cluster_002 having the most edges with 7, and the presence of pattern_ids 1 and 15 in multiple clusters.

Account Interconnection Graph

This static exhibit is filtered for legibility: it shows the material account-to-account relationships and only the most evidential external counterparties, while the full-density network remains available in the UI graph data.

Suspicious Activity Timeline

The graph shows a timeline of suspicious activity from 2017-04-05 to 2021-03-31, covering 1307 transactions. The most notable figure is the total number of transactions, with 21 flagged and excluded. An investigator should take note of the time span of approximately 4 years and the volume of transactions to identify potential patterns or anomalies.

Fraud-Pattern Summary

The graph shows a summary of fraud patterns with the most notable figure being 33 instances of Duplicate Verification. The busiest pattern is Duplicate Verification, occurring 33 times, while other patterns like Structuring Smurfing Detection and Money Trail Tracing occur 5 and 8 times respectively. An investigator should take note of these figures to identify potential fraud trends.

6 • Final Summary

1 account(s) were ranked by composite suspicion score. The highest-scoring accounts show the broadest, strongest pattern evidence and warrant priority review.

Rank	Account Holder	Score	Key Concern
1	KAMALESH SUBHASH INAMDAR (1357102000000198)	1,003	Money Trail Tracing

Score legend

Score Range	What It Means
600+	Strong evidence across multiple independent pattern types — high investigative priority
300–599	Moderate evidence, worth follow-up but less urgent
Below 300	Weak or isolated signals, mostly for reference

Generated by the Survey Corps Investigation Engine for CIDECODE · Run run_20260704_170513 · 04 July 2026, 17:06. All findings are investigative leads requiring independent verification.

Data Security & Method (Appendix)

What stays on this machine

- All fraud detection, scoring and ranking run on this machine (deterministic code).
- Raw bank statements and extracted transactions never leave the machine.
- The money-flow graph, clusters and suspicion scores are computed locally.

What is sent to an external service

- Only small, redacted text samples are sent to the language model to describe a statement's column layout when local parsing is insufficient.
- For images / scanned PDFs, the page pixels are sent to a vision model (the one unavoidable case).
- The language model only rewrites explanations into plain language; it never changes a number, account, or decision.

Language-model calls this run: 15 · partial_failure
