SACHIN CHAUHAN WEAK

Account Number 250269305544183 · Unknown Bank · Score 222

Rank #9

Account SACHIN CHAUHAN (250269305544183) exhibits suspicious money behavior, characterized by multiple debit transactions on a single day totaling a significant amount, and a large credit transaction traced into subsequent debits. This pattern suggests potential structuring and money laundering activities. The account's transactions warrant further investigation due to the high volume and value of transactions.

- **Structuring Smurfing Detection** STRONG — On 2025-04-28, 13 debit transactions totaling 200001.00 were made, each below the individual cutoff, indicating potential structuring. (+4 more of this type)
- **Money Trail Tracing** STRONG — A credit of 200152.00 from MsS SKENTERPRISES BANDHAN was traced into 14 subsequent debits, with the entire amount allocated, suggesting money trail manipulation.
- **Money Flow Graph Construction** STRUCTURAL — A money-flow graph with 688 nodes and 1196 edges was constructed, indicating a complex transaction network, but specific suspicious activity details are not provided in this finding.
- **Round Value Debit Patterns** WEAK — 49 round-value debits totaling 980000.00 were made, with 49 instances of 20,000, suggesting a pattern of high-value, potentially suspicious transactions.

Assessment: 1 strong pattern type(s) and 3 distinct pattern(s) — weak evidence.

ADITYA REDDY WEAK

Account Number 110200939775 · Unknown Bank · Score 126

Rank #10

The account ADITYA REDDY (110200939775) exhibits suspicious money behaviour, including shared UPI identifiers and low-value transactions, indicating potential coordinated activity or account testing. This account's transactions and connections warrant further investigation due to the presence of strong patterns and

distinct patterns. The account's score of 126 and the appearance of its UPI identifier across multiple accounts raise concerns about its legitimacy.

- **Shared Upi Identifiers** **STRONG** — UPI identifier 'anita@ybl' appears across 3 accounts: DEEPA CHAUHAN, ADITYA REDDY, and VIKRAM SAXENA, suggesting shared ownership or coordinated activity. (+2 more of this type)
- **Low Value Account Testing** **STRONG** — Accounts 46015@ptyes and ADITYA REDDY exchanged 3 low-value transactions of 10.00 each, consistent with account-testing behaviour, followed by larger transfers.
- **Duplicate Verification** **WEAK** — Extraction flagged a duplicate, but an independent cross-check found no match, indicating a possible extraction false positive. (+7 more of this type)
- **Money Flow Graph Construction** **STRUCTURAL** — A money-flow graph was constructed with 688 nodes and 1196 directed transaction edges, including transactions involving Mr. Harish Kumar, DEEPA CHAUHAN, and others.

5 · Money-Flow Graphs

Case Overview Graph

The graph shows 8 clusters with the largest cluster, cluster_001, having 14 accounts, 1107 edges, and a total score of 1690.0637. Cluster_001 and cluster_002 have the most notable figures, with cluster_002 having a total score of 1556.8126. An investigator should take note of the high total scores and edge counts in these clusters, indicating potentially significant money flow patterns.

Account Interconnection Graph

This static exhibit is filtered for legibility: it shows the material account-to-account relationships and only the most evidential external counterparties, while the full-density network remains available in the UI graph data.

Suspicious Activity Timeline

The graph shows a timeline of suspicious activity from 2009-08-01 to 2026-01-04, covering 3895 transactions. The most notable figure is the total number of transactions, which is 3895, with only 2 transactions flagged and excluded. An investigator should take note of the long time span of approximately 16 years and the large number of transactions, which may indicate a complex and prolonged suspicious activity pattern.

Fraud-Pattern Summary

The graph shows various fraud patterns, with the most notable being Duplicate Verification with 511 counts, and other significant patterns include Structuring Smurfing Detection with 31 counts and Money Trail Tracing with 19 counts. An investigator should take note of these figures to identify potential fraud areas. The data spans multiple patterns, but the time span is not specified in the provided data.

6 · Final Summary

10 account(s) were ranked by composite suspicion score. The highest-scoring accounts show the broadest, strongest pattern evidence and warrant priority review.

Data Security & Method (Appendix)

What stays on this machine

- All fraud detection, scoring and ranking run on this machine (deterministic code).
- Raw bank statements and extracted transactions never leave the machine.
- The money-flow graph, clusters and suspicion scores are computed locally.

What is sent to an external service

- Only small, redacted text samples are sent to the language model to describe a statement's column layout when local parsing is insufficient.
- For images / scanned PDFs, the page pixels are sent to a vision model (the one unavoidable case).
- The language model only rewrites explanations into plain language; it never changes a number, account, or decision.
