FINANCIAL INVESTIGATION REPORT

Prepared by:

Survey Corps — Investigation Engine

Case reference: run_20260705_102713

Generated: 05 July 2026, 10:27

This report presents investigative leads based on transaction pattern analysis. It does not establish guilt — all findings should be independently verified before action.

Case Narrative

In brief, for the investigating officer:

- No money moved across the accounts in this case.
- Rs 200,000.00 of incoming funds was used for transfers or withdrawals.
- The first account to investigate is VAISHALI TIWARI with account number 92883409730.

#1 • VAISHALI TIWARI (92883409730)

WEAK

• Score 103

Key Concern: Money Trail Tracing

The provided forensic finding indicates a money trail where a credit of ₹200,000.00 was traced into two subsequent debits, with the entire amount being allocated, suggesting a potential pattern of money movement.

cluster_001

Account VAISHALI TIWARI (92883409730) was evaluated as an isolated account with no established transactional link to other accounts in this case. It was associated with money_trail_tracing.

VAISHALI TIWARI (92883409730)

2 · Input Summary

This report is based on 1 uploaded statement file(s) covering 1 account(s) and 15 transactions, spanning 2025-05-08 to 2025-05-26.

Account Number	Account Holder	Bank	IFSC
92883409730	VAISHALI TIWARI	IDFC First Bank	IDFB0020258

3 · Analysis Summary

The engine ran 1 account(s) through the full deterministic detector suite and built a money-flow graph of 1 nodes and 0 transaction edges.

4 · Findings by Account

VAISHALI TIWARI **WEAK**

Account Number 92883409730 · IDFC First Bank · Score 103

Rank #1

This account is suspicious due to a large credit of ₹200,000.00 being traced into two subsequent debits, with the entire amount being allocated. The money trail suggests a potential pattern of money movement. The account's simple financial structure with no recorded transactions also raises concerns.

- **Money Trail Tracing** **STRONG** — A credit of ₹200,000.00 was traced into two subsequent debits on 2025-05-08, with the entire amount being allocated, suggesting a potential pattern of money movement.
- **Money Flow Graph Construction** **STRUCTURAL** — A money-flow graph with 1 node and 0 edges was constructed, implying a simple financial structure with no recorded transactions.

Assessment: 1 strong pattern type(s) and 1 distinct pattern(s) — weak evidence.

5 · Money-Flow Graphs

Case Overview Graph

Insufficient connected transactions to render this graph for this run.

This exhibit summarizes reconstructed case clusters only: each node is a cluster with its risk level and account/edge counts, while detailed account links are shown separately for the highest-risk clusters.

Account Interconnection Graph

Insufficient connected transactions to render this graph for this run.

This static exhibit is filtered for legibility: it shows the material account-to-account relationships and only the most evidential external counterparties, while the full-density network remains available in the UI graph data.

Suspicious Activity Timeline

The graph shows 15 transactions occurring between 2025-05-08 and 2025-05-26, with no flagged transactions excluded from the analysis. An investigator should note the 18-day time span and the total of 15 transactions. The busiest pattern and largest transfers are not discernible from the given data, but the absence of excluded flagged transactions is notable.

Fraud-Pattern Summary

The money-flow graph shows 1 instance of Money Flow Graph Construction, 1 instance of Money Trail Tracing, and 1 instance of Llm Investigated Anomalies, indicating a single occurrence of each pattern within the observed time span, which an investigator should examine for potential fraud.

6 · Final Summary

1 account(s) were ranked by composite suspicion score. The highest-scoring accounts show the broadest, strongest pattern evidence and warrant priority review.

Rank	Account Holder	Score	Key Concern
1	VAISHALI TIWARI (92883409730)	103	Money Trail Tracing

Score legend

Score Range	What It Means
600+	Strong evidence across multiple independent pattern types — high investigative priority
300–599	Moderate evidence, worth follow-up but less urgent
Below 300	Weak or isolated signals, mostly for reference

Generated by the Survey Corps Investigation Engine for CIDECODE · Run run_20260705_102713 · 05 July 2026, 10:27. All findings are investigative leads requiring independent verification.

Data Security & Method (Appendix)

What stays on this machine

- All fraud detection, scoring and ranking run on this machine (deterministic code).
- Raw bank statements and extracted transactions never leave the machine.
- The money-flow graph, clusters and suspicion scores are computed locally.

What is sent to an external service

- Only small, redacted text samples are sent to the language model to describe a statement's column layout when local parsing is insufficient.
- For images / scanned PDFs, the page pixels are sent to a vision model (the one unavoidable case).
- The language model only rewrites explanations into plain language; it never changes a number, account, or decision.

Language-model calls this run: 2 · active
