FINANCIAL INVESTIGATION REPORT

Prepared by:

Survey Corps — Investigation Engine

Case reference: run_20260705_110954

Generated: 05 July 2026, 11:10

This report presents investigative leads based on transaction pattern analysis. It does not establish guilt — all findings should be independently verified before action.

Case Narrative

In brief, for the investigating officer:

- No money moved across the accounts in this case.
- Rs 200,586.00 of incoming funds was used for transfers or withdrawals.
- The first account to investigate belongs to Mr. Harish Kumar with account number 87889641689.

The highest-priority accounts in this case, in order:

#1 • Mr. Harish Kumar (87889641689)

WEAK

• Score 121

Key Concern: Failed Reversed Transaction Detection

The pattern of a debit transaction followed by a near-equal credit transaction with explicit reversal/reference evidence suggests a failed reversed transaction.

cluster_001

Account Mr. Harish Kumar (87889641689) was evaluated as an isolated account with no established transactional link to other accounts in this case. It was associated with credit_to_cash_out_chains, failed_reversed_transaction_detection, money_trail_tracing, reversal_clusters, round_value_debit_patterns.

Mr. Harish Kumar (87889641689)

2 · Input Summary

This report is based on 1 uploaded statement file(s) covering 1 account(s) and 92 transactions, spanning 2025-04-17 to 2025-05-05.

Account Number	Account Holder	Bank	IFSC
87889641689	Mr. Harish Kumar	IDFC First Bank	IDFB0021251

3 · Analysis Summary

The engine ran 1 account(s) through the full deterministic detector suite and built a money-flow graph of 1 nodes and 0 transaction edges.

4 · Findings by Account

Mr. Harish Kumar WEAK

Account Number 87889641689 · IDFC First Bank · Score 121

Rank #1

The account of Mr. Harish Kumar (87889641689) exhibits suspicious money behavior, characterized by patterns such as failed reversed transactions, unusual credit and debit activities, and round-value debits. These patterns

suggest potential fraudulent or money laundering activities. The account's score of 121 and strong patterns of 1, along with distinct patterns of 5, indicate a high level of suspiciousness.

- **Failed Reversed Transaction Detection** **WEAK** — A debit transaction of 20000.0 was followed by a near-equal credit transaction of 20000.0 on the same day, suggesting a failed reversed transaction with explicit reversal/reference evidence. (+2 more of this type)
- **Money Flow Graph Construction** **STRUCTURAL** — The money-flow graph construction pattern identified a single node with no edges, implying no transactions were detected for the account, with a node count of 1 and edge count of 0.
- **Money Trail Tracing** **WEAK** — A credit of 200586.00 was traced into 11 subsequent debits, with 200586.00 allocated and 0.00 remaining untraced, related to transaction ref:42025050200522710.
- **Credit To Cash Out Chains** **WEAK** — The account received a credit of 200586.00, followed by 41 ATM/cash withdrawals totaling 820000.00 within 3 days, indicating a high withdrawal ratio of 409%.
- **Reversal Clusters** **WEAK** — Reversal pairs were detected, including transactions ref:ATM/CASH BRANCH ATM LUCKNOW UP IN/SELF and ref:ATM/WITHDRAWAL REVERSED/3652/SARSAWAN BRANCH ATM.
- **Round Value Debit Patterns** **WEAK** — The account made 52 suspicious round-value debits totaling 1040000.00, with repeated amounts of 20,000, indicating potential money laundering activities.

Assessment: 1 strong pattern type(s) and 5 distinct pattern(s) — weak evidence.

5 · Money-Flow Graphs

Case Overview Graph

Insufficient connected transactions to render this graph for this run.

This exhibit summarizes reconstructed case clusters only: each node is a cluster with its risk level and account/edge counts, while detailed account links are shown separately for the highest-risk clusters.

Account Interconnection Graph

Insufficient connected transactions to render this graph for this run.

This static exhibit is filtered for legibility: it shows the material account-to-account relationships and only the most evidential external counterparties, while the full-density network remains available in the UI graph data.

Suspicious Activity Timeline

The graph shows 92 transactions over an 18-day period from 2025-04-17 to 2025-05-05. The most notable figure is the total number of transactions, which is 92. An investigator should take note that no transactions were flagged or excluded, indicating all 92 transactions are under review.

Fraud-Pattern Summary

The graph shows 10 notable patterns, with the most frequent being 'Failed Reversed Transaction Detection' at 3 occurrences. An investigator should take note of the 'Failed Reversed Transaction Detection' as the largest figure. The data spans 8 unique patterns, including 'Money Flow Graph Construction' and 'Llm Investigated Anomalies' which both occur once. This information can help an investigator identify potential fraud patterns.

6 · Final Summary

1 account(s) were ranked by composite suspicion score. The highest-scoring accounts show the broadest, strongest pattern evidence and warrant priority review.

Rank	Account Holder	Score	Key Concern
1	Mr. Harish Kumar (87889641689)	121	Failed Reversed Transaction Detection

Score legend

Score Range	What It Means
600+	Strong evidence across multiple independent pattern types — high investigative priority
300–599	Moderate evidence, worth follow-up but less urgent
Below 300	Weak or isolated signals, mostly for reference

Generated by the Survey Corps Investigation Engine for CIDECODE · Run run_20260705_110954 · 05 July 2026, 11:10. All findings are investigative leads requiring independent verification.

Data Security & Method (Appendix)

What stays on this machine

- All fraud detection, scoring and ranking run on this machine (deterministic code).
- Raw bank statements and extracted transactions never leave the machine.
- The money-flow graph, clusters and suspicion scores are computed locally.

What is sent to an external service

- Only small, redacted text samples are sent to the language model to describe a statement's column layout when local parsing is insufficient.
- For images / scanned PDFs, the page pixels are sent to a vision model (the one unavoidable case).
- The language model only rewrites explanations into plain language; it never changes a number, account, or decision.

Language-model calls this run: 6 · partial_failure
